

While sitting in a chair, a person exerts the forces in the diagram below. Determine all forces acting on the chair at points A and B. (Assume A is frictionless and B is a rough surface).

$$\sum F_x = 15 - F_{FB} = 0$$

$$\sum F_y = F_{NA} + F_{NB} - 180 = 0$$

$$\sum M_B = -(F_{NA})(18) + (180)(6) - (15)(36) = 0$$

$$F_{NA} = \frac{-(15)(36) + (180)(6)}{18}$$

$$F_{NA} = 30 \text{ lbs}$$

$$F_{FB} = 15 \text{ lbs}$$

$$F_{NB} = 180 - F_{NA}$$

$$F_{NB} = 150 \text{ lbs}$$
